Ross and TJ Maxx both have good sized home décor departments hiding behind all their apparel.

Although JoAnn's and Michaels have plenty of craft and DIY supplies, they also both have ready-made seasonal décor at the fronts of their stores.

Another store people mostly think of for craft supplies. Don't overlook their gigantic selection of small accent furniture, wall décor, and decorative art items.

When you need something cute, but you have kids & pets who tend to destroy things, Target and WalMart both have affordable (but not precious) items for your home.

Did you know that Home Depot has a line of furniture available to order from it's website? Check it out!
